East Side
Burial
Locations***

Olivet Cemetery Covington NY E Side Locations

There are 23 North to south rows west of the entrance row and 17 North to south rows to the East. The Entrance row is empty except for the Southern most end. For easy Identification and for locating I have numbered them from North to South row 1 starting at the far NW corner counting the entrance row as row 24 and continuing to count rows to the last currently used row which is row 41. Some rows have both head stones and foot stones and sometimes stones in the middle. These will be noted as Row w W stone, Middle stone or East stone. This is the easiest way to find stones. You may also count stones from the entrance row which is row 24 going down as you go West or going up as you go East. It appears that each lot has 5 adult graves. Adult graves spaces can hold several Children or babies or cremains. Also a grave may have persons buried on more than one level. See Index book. and book West side locations by row to see who is next to each other and get a family picture. I will also put up a map. I have also photographed every stone visit dogoodforall.today to see map and stones soon. I am Wesley E. Arnold arnwes@gmail.com

The map first lists purchaser name after the word lot # which may be different than the name on the stone. After the lot names are the names on the stones.

Row 24 is Entrance row mostly empty
